Patrick Brown

## To the Edge of Space

A collection of photographs from an off-the-shelf Canon SD800is camera that flew to the edge of space on a weather balloon on January 5, 2010 with the sole intent of capturing the beauty of the curvature of the Earth and the darkness of space.

On January 5, 2010, a weather balloon was launched in eastern Colorado carrying an off-the-shelf Canon SD800is camera. It flew to 93,600 feet above the surface of the Earth taking photos once per minute. Meanwhile, a chase ensued on the ground as my friends and I followed intermittent GPS location updates from the craft. After recovering the camera unscathed, we were delighted to see these fantastic photographs that it captured from the Edge of Space.
